SUMMARY

I'm a software builder who loves coding and making things work faster and efficiently. Throughout my career, I've used many programming languages, such as JavaScript, Ruby, C#, and Python, to create static and dynamic web and native applications. I'm good at fixing software bugs and making things run efficiently. In one of my previous roles, I helped improve a Lost and Found app that reduced bugs by 30% and improved speed and efficiency by 20% and 25%. I'm always happy to learn and try new things in tech.

SKILLS

Front-End: JavaScript, Vue.js, React, Redux, Next.js, jQuery, HTML5, CSS3
Back-End: Ruby, JavaScript, Java, Python, Ruby on Rails(RoR), NodeJS, NestJS, Django, REST, GraphQL
Databases: MySQL, PostgreSQL, MongoDB
Tools & Methods: Git, GitHub, Heroku, Netlify, Mobile/Responsive Development, RSpec, TDD, Chrome Dev Tools
Professional: Remote Pair-Programming, Teamwork, Mentoring, Problem-solving, DSA and Critical Thinking

EXPERIENCE

AnyHelpNow — **Remote** *April 2026– November 2026*
Full-stack Engineer(Full Time)
- I am assigned to work on the anyhelpnow.com website
- Fix bugs and implement new features.

Prospect Engine LLC — **Hybrid** *October 2024– March 2026*
Full-stack Engineer(Full Time)
- I am assigned to the SaaS Product team, maintaining Sendout.ai.
- Reverse engineering various platforms to implement Ai based automation.
- Fix bugs and implement new features.

Bengal7 IT Solutions — **Remote** *April 2024– August 2024*
Full-stack Engineer(Contractor)
- I have developed web and native applications such as ERP, CRM, and ticket systems using the MERN stack.
- I believe in TDD development so my clients can have a seamless software experience.

JUUBIX — **Remote** *December 2023– March 2024*
Full-stack Engineer(Full Time)
- We developed a web application using the MERN stack and Built a game using Unity and C#.
- After starting work, I was promoted to sub-team lead in just two weeks.
- I was also a member of the Q&A team.

2i Global Network — **Remote** *June 2023– November 2023*
Ruby on Rails Developer(Contractor)
- I was developing new features for a web application using Ruby on Rails(RoR), React, and PostgreSQL.
- I take pride in achieving bug-free implementation with a 100% client satisfaction rate through strict testing.

R&H Department, Patuakhali — **On-site** *May 2020 – August 2022*
Software Engineer(Outsourced)
- I achieved bug-free application performance with a 99% satisfaction rate through testing.
- I was proactively adopting many cutting-edge techniques for enhanced efficiency and quality.

EDUCATION

University of Global Village, Barisal — *January 2021 – December 2024*

Bachelor of Science in Computer Science and Engineering (B.Sc in CSE)

- Completed comprehensive coursework in advanced programming, algorithms, and data structures.
- Experienced in web/mobile app development, AI, and computer networking.
- Developed a strong theoretical foundation in computer science principles.

MICROVERSE — *September 2022 – August 2023*

Remote Full Stack Web Development Program, Full-Time

- 1800+ hours mastering algorithms, data structures, and full-stack development.
- Remote pair programming using GitHub, git-flow, and collaborating with developers worldwide.
- Hands-on experience in web and mobile app development, AI, and computer networks.
- Comprehensive knowledge of programming languages, algorithms, and data structures.

Begum Fazilatunnesa Polytechnic Institute, Patuakhali — *January 2012 – December 2016*

Diploma in Civil Engineering

- Coursework included structural analysis, geotechnical engineering, and construction management.
- Experienced in CAD software, project planning, and site supervision.
- Developed a strong theoretical foundation in civil engineering principles.
